OBJECTIVE SUMMARY

A motivated and detail-oriented MERN Stack Developer with hands-on experience building responsive, visually engaging front-ends and scalable full-stack applications using MongoDB, Express.js, React.js, Next.js and Node.js. Also experienced in WordPress & WooCommerce development. Passionate about turning design ideas into clean, functional, production-ready web experiences and eager to contribute to a professional development team.

PROJECTS

Doctor Appointment Booking Website — Completed (Full Stack)

React.js · Next.js · Node.js/Express · MongoDB · Admin Panel · Email Integration

- Multi-step appointment booking flow: Service selection, Basic Info, Date & Time, Appointment Type, Payment and Confirmation.
- Booked appointment details are captured and sent directly to the clinic's Gmail inbox via integrated backend email-notification logic.
- Built a full-featured Admin Panel: manage doctors (add/edit/remove), view and update appointment status, manage patient bookings, and secure admin login/authentication.
- Responsive, step-based UI built with React.js and Next.js focused on a smooth booking experience.

Nurfia — Full Stack Fashion E-Commerce

HTML · CSS · JavaScript · Vite · Node.js · Express.js · MongoDB · Cloudinary

- Full stack fashion e-commerce app with a Node.js/Express backend and MongoDB database.
- Live product search, wishlist, cart functionality, and login/register with JWT authentication.
- Admin panel with full CRUD and product image uploads via Cloudinary.
- Live deployed on Vercel (frontend) and Bonto (backend).

Chirp — Mini Social Media App

Node.js · Express.js · MongoDB · JWT · bcrypt · Vanilla JavaScript

- A Twitter/X-style mini social media app with signup/login using JWT authentication and bcrypt password hashing.
- Create, view, and delete posts (280-character limit), with like/unlike and commenting functionality.
- Follow/unfollow system between users, with editable user profiles (name and bio).
- Built with a Node.js/Express backend, MongoDB (via Mongoose) database, and a vanilla JavaScript frontend.

Landlinger — SaaS Landing Page

React.js · Vite · Tailwind CSS · Framer Motion

- Developed a responsive SaaS landing page from scratch with a cohesive visual identity.
- Built with React + Vite for fast performance, Tailwind CSS for styling, and Framer Motion for scroll-based reveal animations across Hero, Pricing, Testimonials and Contact sections.

Mantu — E-Commerce Store

HTML · CSS · Bootstrap 5

- Fully responsive e-commerce store built with Bootstrap 5.
- Clean product layout and responsive grid structure.

WordPress E-Commerce Website

WordPress

- Fully functional e-commerce website with product listings, cart, and checkout flow.

PREFERENCES

Open to remote full stack (MERN) or frontend development roles with opportunities for growth and productivity.
